8+ YEARS EXPERIENCE **45%** PEAK ENGAGEMENT UPLIFT **15+** APPS & PLATFORMS SHIPPED **SEO/GEO** SEARCH & AI VISIBILITY

PROFILE

Software & Website Developer with 8+ years of experience turning product requirements into responsive, high-performance web and mobile applications (Flutter, Laravel, Vue.js, Node.js). Track record of shipping production platforms that lifted engagement and revenue by up to 45% and cut delivery time through reusable, well-architected components. Brings a rare second skill set to development teams: hands-on SEO and GEO (Generative Engine Optimization), ensuring products are not only well-built but discoverable — in traditional search and in AI-driven answer engines. Backed by a Master's in Cybersecurity and a consistent record of delivering in fast-moving agile teams.

CORE SKILLS

MOBILE DEVELOPMENT Flutter · React Native · Android/iOS · BLoC/Riverpod · Dio/Chopper/GraphQL · Firebase · Clean Architecture

WEB & BACKEND Laravel (PHP, NOVA) · Vue.js · Next.js · TypeScript · Tailwind CSS · Node.js/Express.js · RESTful APIs · SQL & NoSQL (MongoDB, SQLite) · Docker

SEO & GEO Technical SEO audits · on-page & content optimization · structured data/schema markup · Core Web Vitals · optimizing content for AI/LLM answer engines

AI & AUTOMATION AI system management · OpenAI API integration · Google ML Kit · workflow/process automation

TOOLS & CLOUD Git/GitHub/GitLab · Google Cloud · AWS · CI/CD · Figma/Adobe XD/Sketch

PROFESSIONAL EXPERIENCE

Mobile Application Developer (Android & iOS) · *Fanavaran* — Sep 2026 - Present

- Rebuilding the company's Android and iOS app from the ground up with React Native, collaborating with the IT team to improve the existing product.
- Developed a dedicated CLI to manage the application project and support development workflows.
- Published the Android app on Google Play and submitted the iOS app to the App Store, where it is currently under review.
- Contribute to website and backend development alongside primary mobile application responsibilities.

Freelance Software & Website Developer · *Self-Employed* — Apr 2026 – Present

- Delivering project-based Laravel, Vue.js, and Flutter development for international clients on a contract basis.
- Founded and currently operate three personal business ventures, applying hands-on full-stack development and SEO/GEO strategy to build and grow them from the ground up.

PHP Laravel & Vue.js Developer · *Corefinity (Destinology)* — Oct 2025 – Apr 2026

- Engineered core booking flows — destination discovery, search/filtering, flights, accommodation and extras — for a large-scale holiday platform used by thousands of travellers, built with Laravel and Vue.js.
- Raised UX consistency across devices by building a library of reusable Vue.js components, cutting future feature build-time for the team.
- Kept production stable while shipping new features weekly, integrating backend APIs and database logic in Laravel within a fast-moving agile workflow.

Fullstack Developer · *WooCom Ecommerce (Startup)* — Jan 2025 – Mar 2025

- Took a startup from Figma concept to a live, fully responsive e-commerce site and app across web, mobile and tablet in under three months.
- Gave the founders real-time control of the business by building a custom Firebase-powered admin panel with secure auth and Firestore-backed order/customer data.

Flutter Application Developer · *NIU Nature (Healthcare App)* Sep 2023 – Mar 2024

- Delivered a healthcare app built around daily programs from German physicians, lifting user engagement by 30% through Apple/Google authentication and in-app purchase integration.
- Designed and shipped a health-monitoring dashboard that drove a 45% surge in engagement and a 20% revenue boost within the first six months.

Relocation & Academic Preparation — Iran → Italy Oct 2019 – Sep 2022

Completed IELTS certification, official document translation/legalization, and visa processing in preparation for postgraduate study abroad.

Flutter Application Developer · *IRIC* Oct 2018 – Oct 2019

- Turned user testing into product decisions, redesigning the UX of a smart-home kit app to grow positive reviews by 35% and daily active users by 60%.
- Cut support tickets by 20% by pairing gamification and social-sharing features with a structured user-training program.

Android Application Developer · *Dade Gostar GHOMES* Oct 2018 – Oct 2019

- Led a multidisciplinary team building a telemedicine platform that reduced patient no-shows by 20% and lifted satisfaction scores by 15% within six months.
- Extended the platform across four verticals: hospital management, e-commerce, drug store, and blood-donation coordination.

Android Application Developer · *Graph* Oct 2016 – Oct 2017

- Took ownership of an e-commerce app build end-to-end and modernized a legacy Basic4Android system still in daily use.
- Grew the team's capability by mentoring two junior developers in Android programming while designing the UI for a new card-management product.

Android Developer (Internship) · *Mana (Greenweb)* Jun 2016 – Sep 2016

- Shipped a feature-rich Android app that drove a 10% increase in monthly sales within five months of launch.
- Sharpened go-to-market targeting through competitor research, lifting click-through rates 20% and conversions 15% in three months.

FEATURED PROJECTS

Wealthio · Founder & Full-Stack Developer *Live Platform*

- Founded and built Wealthio as a personal business venture, owning product development from UI/UX design to backend implementation.
- Developed a Progressive Web App (PWA) with a Next.js frontend and a PHP/Laravel backend.

Destinology.co.uk · *Live Website*

- Large-scale holiday booking platform (PHP Laravel, Vue.js) with dynamic destination search, filtering, and package selection, built and maintained alongside the Corefinity team.

NIU Nature · *App Store*

- Production healthcare app with backend-integrated dynamic content, shipped and maintained for a live App Store audience.

WooCom Flutter E-Commerce · *Live Demo*

- Fully responsive e-commerce app for web, tablet and mobile, with a Firebase backend for auth, product management and orders.

TimeSync Healthcare AI · *GitHub*

- OpenAI-powered Flutter app delivering personalized health plans, backed by a Node.js/MongoDB service with Firebase real-time notifications.

EDUCATION

Master of Cybersecurity · University of Padua, Italy (2022 – 2025)

Bachelor of Computer Software Engineering · Sadjad University of Technology, Mashhad, Iran (2016 – 2021)
