

Sobhan (Sam) is a Mobile Application Developer

ABOUT ME

I'm Sobhan (Sam), Motivated and experienced website and mobile app developer with expertise in Flutter, Android (Java), Laravel, and Vue.js. Skilled in backend development, RESTful APIs (Node.js / PHP), and database management (SQL & NoSQL). I specialize in creating responsive, high-performance applications, boosting project efficiency by 25% at the initial stage. Passionate about problem-solving, innovation, and continuous learning. I thrive in team environments, collaborating toward shared goals while constantly expanding my technical expertise.

WORK EXPERIENCE

PHP Laravel & Vue.js Developer | Corefinity (Destinology)

Oct 2025 - Present

- Developed and maintained a holiday search and booking platform using Laravel and Vue.js.
- Built core flows for destination discovery, search/filtering, and selecting flights, accommodation, and holiday extras.
- Implemented responsive, reusable UI components in Vue.js to improve UX across desktop and mobile.
- Integrated backend APIs and database logic in Laravel to support dynamic content and booking-related data.
- Collaborated with the Corefinity team in an agile workflow, delivering features, bug fixes, and production support.

WooCom Ecommerce (Startup) - Fullstack developer

Jan 2025 - March 2025

- Built a responsive e-commerce website and mobile app for a startup.
- Converted Figma designs into a cross-platform experience (web/mobile/tablet) with adaptive layouts.
- Developed a custom Firebase-powered admin panel for real-time data management.
- Implemented Firebase Auth and Firestore for secure login and order/customer data storage.
- Delivered a dynamic, device-optimized UI for a smooth user experience.

NIU Nature Application - Flutter application developer

Sep 2023 – Mar 2024

Collaborated with a team to launch a healthcare app that offers daily programs from esteemed German physicians; Integrated Apple and Google authentication along with in-app purchase functionality, resulting in a 30% increase in user engagement through enhanced health monitoring features.

- Developed daily schedules in collaboration with top German doctors, optimizing patient treatment plans and contributing to a 30% rise in positive patient feedback.
- Rolled out an all-encompassing health monitoring dashboard, driving a 45% surge in user engagement and a 20% boost in app revenue in the first half-year.

SKILLS

Mobile App Development:

- Flutter (Cross-platform development)
- Native Android & iOS Development
- State Management (BLoC, Riverpod)
- Networking (HTTP, Dio, Chopper, GraphQL)
- API Integration (RESTful APIs, JSON)
- Firebase Services
- Location Services (Google Maps, Geolocation)
- Unit & Integration Testing
- Figma / AdobeXD / Sketch
- Clean Architecture & Design Patterns
- Object-Oriented & Functional Programming
- Responsive & Adaptive UI (Material Design)

Backend Development Skills:

- Node.js, Express.js, Vue.js
- PHP Laravel (NOVA)
- RESTful API Development
- Database Management (SQLite, MongoDB)
- Docker & Containerization

Tools & Technologies:

- Cloud Platforms (Google Cloud, AWS)
- AI & Machine Learning (Google MLKit, OpenAI)
- CI/CD & DevOps Pipelines
- Version Control (Git, GitHub, GitLab)
- Mobile App Deployment

Soft Skills:

- Problem-Solving & Critical Thinking
- Adaptability & Learning Agility
- Collaboration & Teamwork
- Communication Skills
- Time Management & Prioritization

- Integrated Apple & Google authentication and in-app purchases, increasing user engagement by 30% through improved health monitoring features.
- Introduced comprehensive in-app purchase options for both mobile operating systems, contributing to a 35% growth in digital sales revenue and a 10% improvement in user satisfaction scores.

IRIC - Flutter application developer

Oct 2018 – Oct 2019

Enhanced the smart home kit app's user experience through iterative design improvements and user testing, achieving a 35% increase in positive user reviews and a 60% rise in daily active users.

- Rolled out a series of user-focused enhancements, including gamification features and social sharing options, resulting in a 15% increase in daily active users over six months.
- Executed a robust training program for users, decreasing customer support tickets by 20% and enhancing platform satisfaction by 35% through improved issue resolution skills

Dade Gostar GHOMES- Android application developer

Oct 2018 – Oct 2019

Directed a multidisciplinary team in creating a telemedicine platform, reducing patient no-show rates by 20% and increasing user satisfaction scores by 15% within the first six months. I was involved in the following projects:

- Hospital management app design
- E-commerce solutions
- Drug store applications
- Blood donation center projects

Graph- Android application developer

Oct 2016 – Oct 2017

Mentored two colleagues in Android programming, enhancing company management systems; led the development of an e-commerce app, updated a legacy Basic4Android app, and designed a UI for a card management app without backend support.

Mana (Greenweb)- Android application developer (internship)

June 2016 – Sep 2016

Built and launched a feature-rich Android app, boosting engagement and online visibility and driving a 10% increase in monthly sales within five months. Refined marketing strategy using competitor research, increasing click-through rates 20% and conversions 15% in three months.

EDUCATION

10/09/2016 – 01/31/2021 - **Sadjad University of Technology**

- Bachelor of Computer Software Engineering Organization.

10/09/2022 – 01/31/2025 - **University of Padua Italy**

- Master of Cybersecurity.

PROJECTS

Live Website: [Destinology Holiday Booking](#)

- Developed and maintained a large-scale holiday search and booking platform using PHP Laravel and Vue.js.
- Implemented dynamic destination search, filtering, and holiday package selection (flights, accommodation, special features).
- Built responsive, user-friendly interfaces with Vue.js to enhance the booking experience across devices.
- Collaborated with the Corefinity development team to deliver new features, optimize performance, and support production releases.

App Store: [NIU-Nature Application](#)

- Delivered and maintained a production mobile app published on the App Store.
- Implemented key user-facing features and performance improvements for a smooth, reliable experience.
- Integrated backend services/APIs for dynamic content and core app functionality.
- Collaborated with product/design to ship updates, fix bugs, and improve UX.

GitHub: [WooCom Flutter E-Commerce](#)

- Developed a modern, fully responsive e-commerce app for web, tablet, and mobile.
- Integrated Firebase backend for authentication, product management, and orders.
- Ensured smooth UI/UX with an elegant design inspired by [this Figma template](#).
- Designed a custom admin panel for store management, based on [this Figma design](#).

GitHub: [TimeSync Healthcare AI Powered](#)

- Built a Flutter app that delivers personalized plans using OpenAI API.
- Developed a scalable backend with Node.js and MongoDB, integrating Firebase for real-time notifications.
- Designed user-focused features, including focus pie charts and categorized programs, enhancing engagement and usability.
